

MUKUL DEWANGAN

(650) 300-3875 | mukul.dewangan@gmail.com | [LinkedIn](#) | [GitHub](#)

Principal product manager with 10+ years shipping AI-native and data-rich B2B SaaS, including 0→1 LLM products where evals, model selection, latency, and prompt pipelines were daily operational decisions. Track record designing AI for trust-critical contexts where transparent, evidence-backed outputs and user control are product requirements. Prototypes in Claude Code and Antigravity, designs in Claude Code and Google Stitch, and writes SQL to reduce dependency on upstream resources. Led cross-functional teams across 3 platforms with 10M+ active users; co-founded a social impact startup from zero to sustained revenue.

EXPERIENCE

CREO SOFTECH

Oct 2024 - Present

Principal Product Manager

Advising startups on product strategy, product-market fit, and go-to-market strategy for AI-powered products.

- Designed conversation flows and AI feature integration strategy for a GenAI-powered customer experience, applying prompt engineering and prompt chaining principles to translate product requirements into usable interaction designs.
- Conducted customer discovery interviews and market analysis to identify unmet needs, validate product-market fit, and shape go-to-market strategy.
- Led competitive analysis, value proposition design, and MVP development — guiding the startup from concept through a customer-facing pilot while balancing user requirements with budget constraints.

VENDASTA TECHNOLOGIES

May 2021 - Sep 2024

Senior Product Manager

Owned product strategy and architectural roadmaps for a B2B SaaS platform with \$93M revenue and 10M+ active users, partnering with data scientists, product designers, and engineers on cross-functional AI, analytics, and security initiatives.

- Identified the opportunity for an LLM-powered conversational assistant and drove it from prototype to production for 10M+ users — owning model selection, evaluation pipelines, prompt architecture, and latency trade-offs as daily decisions to balance quality, cost, and response time.
- Identified fragmented customer data patterns through data analysis and customer discovery; drove a platform-wide analytics and reporting overhaul with cross-functional stakeholders, reducing churn by 89% and recovering \$9M in ARR.
- Championed an email verification system rollout in collaboration with data, design, engineering, and marketing teams, increasing lead conversion by 24% and reducing security incidents by 70% through cross-functional collaboration.
- Designed a trust-critical data governance system: audited access control vulnerabilities, defined role-based access architecture, and implemented data controls ensuring transparent, auditable data use for 10M+ users across regulatory boundaries.
- Integrated structured data sources through API-connected ETL pipelines into a NetSuite financial reporting system, partnering with finance and engineering to monitor product profitability and deliver \$450K in annual savings.
- Raised the bar for 7 product managers across platform, data, and AI workstreams through technical direction, roadmap coaching, and AI workflow integration.

USERFUL CORPORATION

Mar 2020 - Feb 2021

Product Manager

Led strategy and execution for the digital signage segment of a B2B SaaS AV solutions company with \$11M ARR.

- Led end-to-end development of a digital signage solution; conducted market analysis, competitive analysis, and customer discovery to define the roadmap; grew segment revenue by 17% (\$83K).
- Migrated client support inquiries to a self-serve portal; improved customer experience through usability studies and streamlined escalation processes, boosting satisfaction by 16%.

GREENVIEW CAPITAL GROUP

Jun 2017 - May 2019

Product Manager

Led automation and digital transformation at an asset management firm with \$250M AUM.

- Owned end-to-end product strategy, execution, and go-to-market for a reporting and analytics transformation; managed workstreams across analytics, market research, and competitive analysis while cutting operational costs by \$1.5M (28%).
- Drove a financial product from concept to delivery in partnership with executives; monitored product profitability and performance through business reviews, growing revenue by 7% (\$170K) within a year.

ZEROMILES

Sep 2014 - Jul 2016

Head of Product / Co-Founder

Co-founded and led product development for a social impact startup focused on healthcare cost reduction and clean water accessibility.

- Shipped a clean water product from concept to 1,500 families served and \$40K ARR; built the product function from scratch, moving through regulatory, funding, and market ambiguity with no prior infrastructure to guide decisions.
- Architected the product through customer interviews, requirements gathering, and solution design to serve underserved communities; secured institutional and government funding by presenting business cases with market research, budgets, and financial forecasts to cross-functional stakeholders.

EDUCATION

RICE UNIVERSITY

Master of Business Administration (MBA)

NATIONAL INSTITUTE OF TECHNOLOGY

Bachelor of Technology

CERTIFICATIONS

AI Product Management | Duke University

Certified Scrum Product Owner (CSPO) | Scrum Alliance

Digital Product Management | University of Virginia

SKILLS

Generative AI · LLM Evaluation & Model Selection · Prompt Engineering · Conversation Design · SQL · 0→1 Product Development · Trust-Critical AI · Prototyping (Claude Code, Antigravity) · Design (Claude Design, Google Stitch) · Data Platforms · API Integration · ETL Pipelines · Data Governance · Product Roadmap · Cross-functional Leadership · Market & Competitive Analysis
